

Release Notes

Version 1.0.0

Supported versions: 11.x.x or greater

Bug fixes:

N/A

New features:

- Create approval workflows without having it to assign to any page or folder
- Allows multiple steps and multiple reviewers by users or roles per step
- Approval workflows are created as DDS items to allow reuse
- Content approval workflows can be initialized by a client instead of the editor. For instance, when a review for a client, requires a workflow before being published
- Set DDS content approval workflows per page type or folder in the assets/media panel
- Folders are displayed with the same hierarchy as in the assets panel

Breaking changes:

N/A
